Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 8, 9 and 20-29, drawn to a method to obtain a wheat plant with improved yield properties wherein said method comprises the steps of (a) construction of an F1 wheat plant; (b) the permanent application of a high concentration of sunlight with no spectrum filter; and (c) the germination of the resulting seeds.

Group II, claim(s) 7 and 10-19, drawn to a plant obtained by a method comprising the steps of (a) construction of an F1 wheat plant; (b) the permanent application of a high concentration of sunlight with no spectrum filter; and (c) the germination of the resulting seeds.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I and II lack unity of invention because even though the inventions of these groups require the technical feature of methods of improving yield in wheat plants via high concentrations of sunlight; however, this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of Reynolds et al (J. Experimental Botany 51: 459-473, 2000). Reynolds et al teach

selecting wheat plants with improved yield via increased photosynthesis (see, for example, page 463, Figure 2 and page 465, 1st column, 'Leaf angle').

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
